How well is support matched to acuity?

* Individuals and families who are under-supported (n=126) are made up of people identifying with:

- Medium acuity yet receiving no support in their housing; and
- High acuity yet receiving no support or only tapered support to sustain their housing.

For people requiring more support, the indicative level of support required is shown below for each population group.

Indicative level of support required (unmet need) for each population group:

Support required	Total		Families		Individuals	
	Total	%	25 and over	24 and under	25 and over	24 and under
Tapered support (medium acuity)	47	37%	18	5	12	12
Long term support (high acuity)	79	63%	25	8	20	26
TOTAL	126	100%	43	13	32	38
